The new Vis Urban Suites & Spa has opened in Bari, a boutique hotel with a wellness facility in the city centre.

In a period 1876 building, the Vis Urban Suites & Spa is the result of an architectural recovery that combines Art Nouveau with contemporary design.

### **The Vis Urban Suites & Spa has a suite with a private swimming pool**

This project is thanks to the professional partnership of two families of Bari entrepreneurs: Gaia and Giuseppe Cobol and Mariadele and Francesco Casillo. The hotel has 12 large rooms-apartments, four of which also have outdoor terraces, while one suite has a private swimming pool carved into the rock.

### **“Bari is the nerve centre of Apulia”**

The spa has a swimming pool and treatment areas, will also be open to external guests by appointment, and it will offer treatments using cosmetic products linked to the Apulian region. The rooftop is due to open next spring and will be, among other things, a location for private events in the city centre. “We are proud to enhance our city, the nerve centre of an ever-expanding Apulia – say Mariadele Casillo and Gaia Cobo - hence the decision to invest in the world of luxury hospitality.”
